2023 EUROPE CONFERENCE

May 9 – 11, 2023, Rotterdam Ahoy, Netherlands

Attend the **Center for Hydrogen Safety Europe Conference, May 9 – 11, 2023, Rotterdam Ahoy, Netherlands**, to learn about the latest developments and advancements in the field of hydrogen safety. The conference brings together experts and professionals from various industries and disciplines, providing a platform for sharing knowledge and experiences, and helping you gain a deeper understanding of hydrogen safety issues, such as handling, storage, and transportation, and how to minimize the risks associated with hydrogen use.

In addition to establishing new collaborations, exchanging ideas, and expanding your professional network, the CHS conference is co-located with The 2023 World Hydrogen Summit and Exhibition. This event is packed with insights and networking activities for the entire value chain, and brings together government, research, innovation and private sector leaders for three full days dedicated solely to hydrogen industry advancement.

Stay informed about the latest developments in global hydrogen safety and contribute to the advancement of this important field.

Conference topics include:

- Incidents and Lessons Learned
- Regulations, Codes, and Standards
- Fundamental Safety Considerations and Best Safety Practices
- Hydrogen Safety in Production and Process Industries
- Injections of Hydrogen to Pipeline and Blending Applications
- Hydrogen Safety in New Applications
- Transportation of Hydrogen
- Public Education and First Responder Training
