RISKCONTROL

HSE RISK & COMPLIANCE ASSURANCE

MODULAR & MULTIDISCIPLINARY HEALTH, SAFETY & ENVIRONMENT (HSE) ASSESSMENT AIMED AT MAPPING AND EVALUATION OF RELEVANT LEGISLATION, COMPANY RULES & REQUIREMENTS AND BUSINESS RISKS

HSE RISK & COMPLIANCE ASSURANCE

Based on our expertise and long standing experience in the field of health, safety and environment within the context of day to day operations in companies and institutions Bureau Veritas Riskcontrol has developed a unique and flexible assessment method: HSE Risk & Compliance Assurance. This method aims at mandatory compliance, voluntary compliance with company rules and regulations and reduction of business risks.

EVALUATION, ASSESSMENT & CONSULTANCY

Both the applicable legislation and operational context of your organization are at the heart of our approach which includes evaluation, assessment and consultancy besides possible support and coaching in a follow up phase. Compliance with your own corporate guidelines is equally included in our HSE Risk & Compliance Assurance.

MULTIDISCIPLINARY APPLICATION & EXPERTISE

Our method includes a wide array of services related to health, safety, environment as well as asset management. Moreover the flexible nature of the HSE Risk & Compliance Assurance allows for inclusion of additional themes which might be relevant for your organization.

Aspects such as personal data protection and information security, specific aspects of sustainability or food safety could very well be included in the method depending on need and relevance.

OPERATIONAL CONTEXT

The operational context of your organization plays an important role in the way we conduct the evaluation and assessment. Do you have to deal with overdue maintenance of business premises or mechanical infrastructure and systems? Or are you having doubts about the actual physical state of your assets from the perspective of staff and visitors?

Are you considering to either purchase or sell business premises or do you intend to expand

your business requiring construction? Or are you possibly dealing with renovation?

We take these different conditions into consideration as well as the business sector in which your organization operates and your core business activity.

CUSTOMIZED PROJECT APPROACH

With the HSE Risk & Compliance Assurance we offer a custom made approach in a project setting. Your wishes, needs and requirements define our approach in which we include the operational circumstances which are relevant to your organization.

Mapping, analysis, evaluation and assessment are the key elements of this method. These individual, consecutive steps result in a clear report which specifies our findings, recommendations and tangible suggestions for follow up.

PARTNERSHIP & TOTAL SOLUTION

Our recommendations and suggestions enable your organization to pursue practical solutions, to minimize risks and to implement improvements. However we are in a position to do more. Generally our involvement doesn't end when we provide our findings and recommendations.

On demand our experts are being deployed in the process of follow up and support to handle identified issues and opportunities of improvement. In this way we create a partnership in close collaboration with your organization which could provide more benefits than the mere execution of a one-off assessment.

BENEFITS

- detailed and real-time insight in the level of compliance of your organization with legislation and company rules & requirements as well as business risks
- practical handles for compliance, reduction of risks and improvement measures
- overview and insight in cost reduction opportunities, improvement of efficiency and strengthening your brand and business reputation
- customized approach and practical support of your organization with optional dedicated software application
